

CREATECH® links innovations to market opportunities. With operations in Chile and the United States, our expert consulting services advance inventions towards applications for national and international markets, create deals for researchers, entrepreneurs and inventors seeking commercial partners, and secure intellectual property protection in support of commercialization strategies. A broad range of services orients technologies towards market opportunities in all stages of development – from ideas or invention disclosures to prototypes or mature technologies.

Experience

Since 2005 CREATECH has performed **more than 300 services** for client technologies and has consulted on **more than 50 discrete patents** filed in Chile and internationally, with inventions including both **life and physical sciences**. Most of our clients' inventions are patentable and have market potential in Chile and abroad.

Global Reach

With a professional network that spans 6 continents, CREATECH has the broad expertise required to analyze and access foreign markets, the tools necessary to detect market opportunities and position innovations in competitive high-growth markets.

Team

The CREATECH team includes employees and consultants located in Chile and the United States. Their expertise in commercial, financial, legal, scientific, technological and other themes is applied as required for the unique needs of each client's project.

Catherine W. Jelinek,
Founder and General
Manager of CREATECH

Ms. Jelinek is a business strategy and technology licensing executive with more than 15 years of experience in business management, marketing, program management and product development in multinational, academic and entrepreneurial environments.

She was selected as one of the first Certified Licensing Professionals (CLP®) worldwide. She is a frequent speaker and a part-time professor at several Chilean universities. Catherine has an MBA from Georgia State University (USA) and a Bachelor of Electrical Engineering from Georgia Institute of Technology (USA). She is fluent in English and Spanish.

Methodologies

CREATECH's world-class innovation assessment methodologies draw upon a unique blend of research and best practices in business strategy, innovation, intellectual property protection and technology transfer from its founders' 40-plus years of business experience and that of leading international associations and alliance partners. These factors, combined with knowledge of and experience in emerging markets, allow us to offer solutions that meet the unique needs of clients located in or entering Latin American markets.

National and International Network

The professional network of clients, strategic alliances and memberships, both in Chile and internationally – for access to markets, innovations, partners and leading-edge technology transfer expertise – form an integral part of the value of CREATECH's services.
